# PayUMoney Opencart Integration Document

PAYUMONEY

Opencart – PayUMoney Integration

Step 1: Merge the files and folders in the PayUMoney module with the Opencart module. In other words, copy the end files/folders in the integration kit sent to you manually according to the files and folder structure.
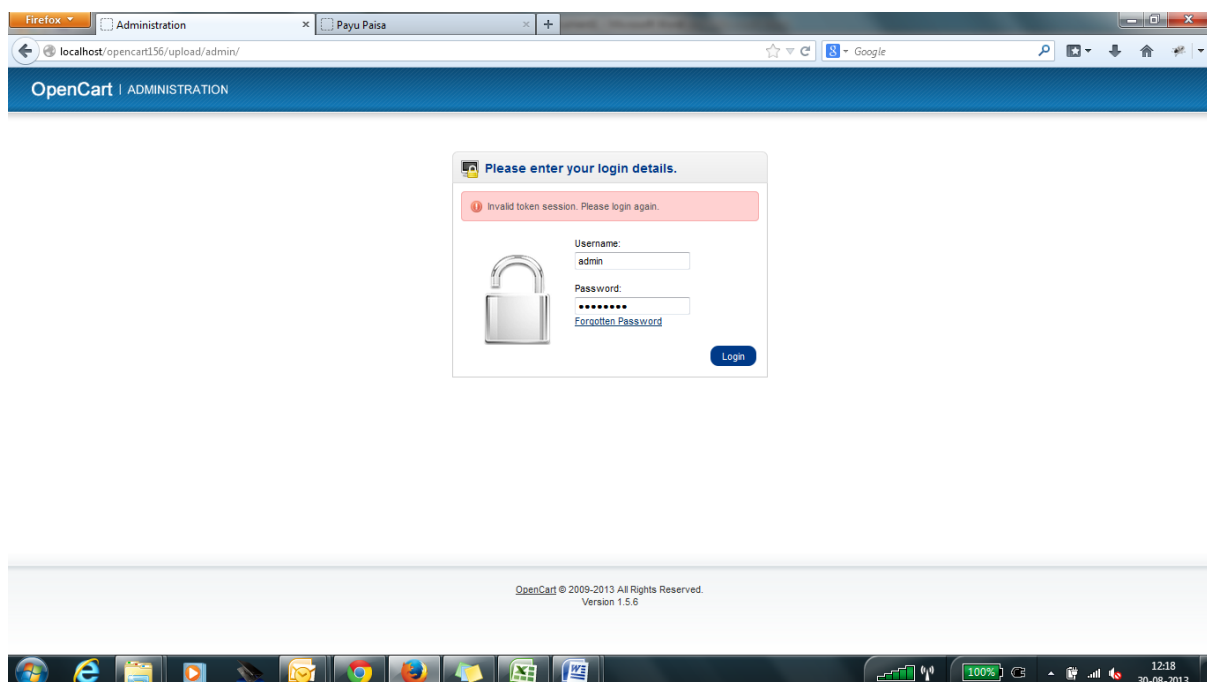

For e.g. the file **admin/controller/payment/payu.php** in the integration kit is pasted in the following directory in the opencart folder – **www/opencart/upload/admin/controller/payment**

The idea is to transfer files/folders from the last matching folder in the integration kit to the last matching folder in the opencart folder. Please notice that the path admin/controller/payment are same in the above mentioned example.
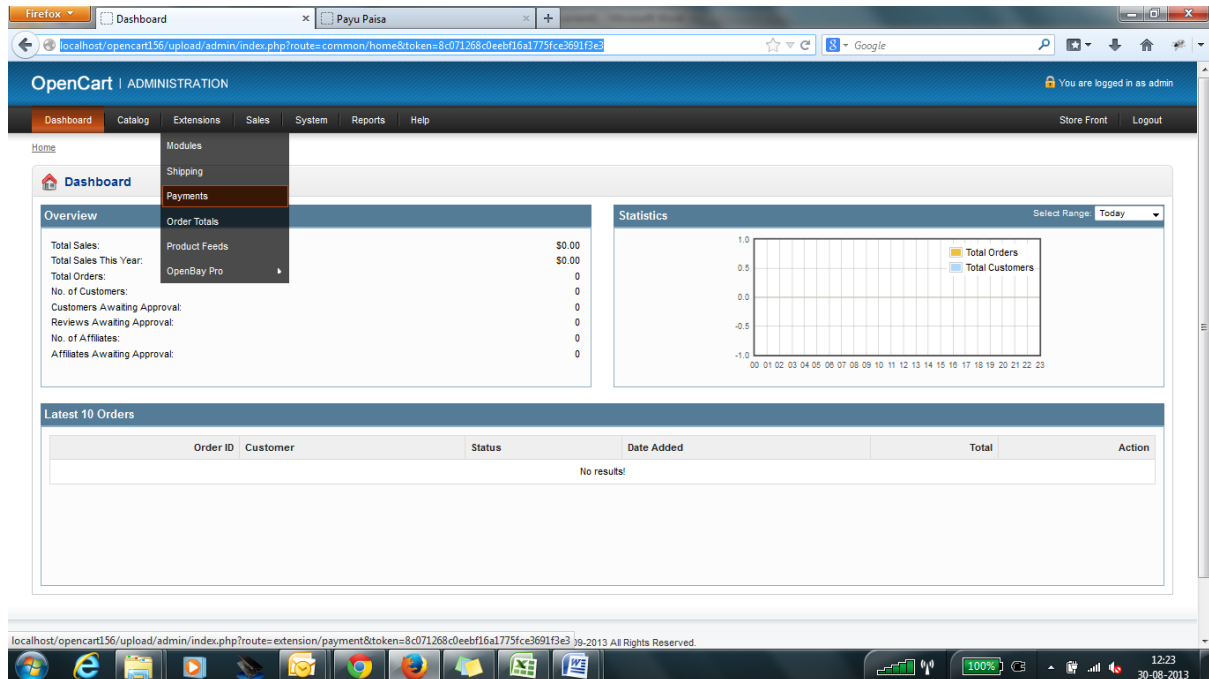

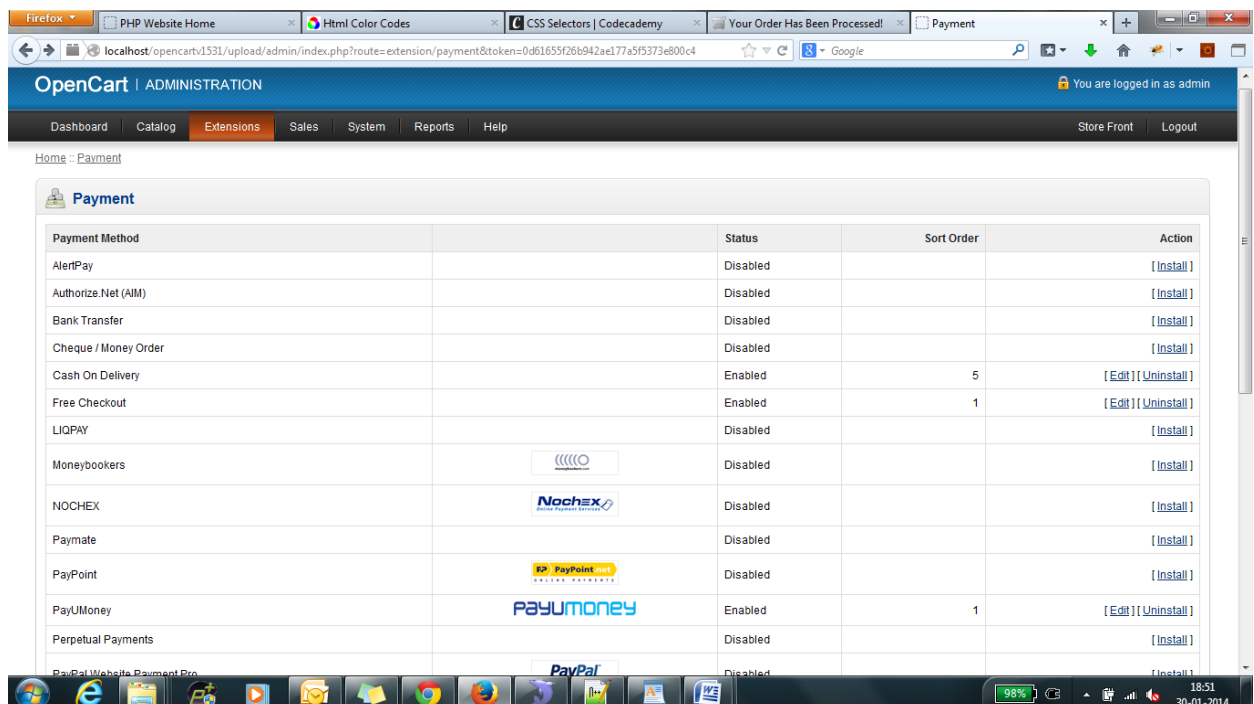

Please view the picture below for better understanding –

Step 2: Please go to your Opencart Admin Panel.

Step 3: Enter your User Name and Password. On the next page, hover your mouse on "**Extensions**" tab and click on "**Payments**".

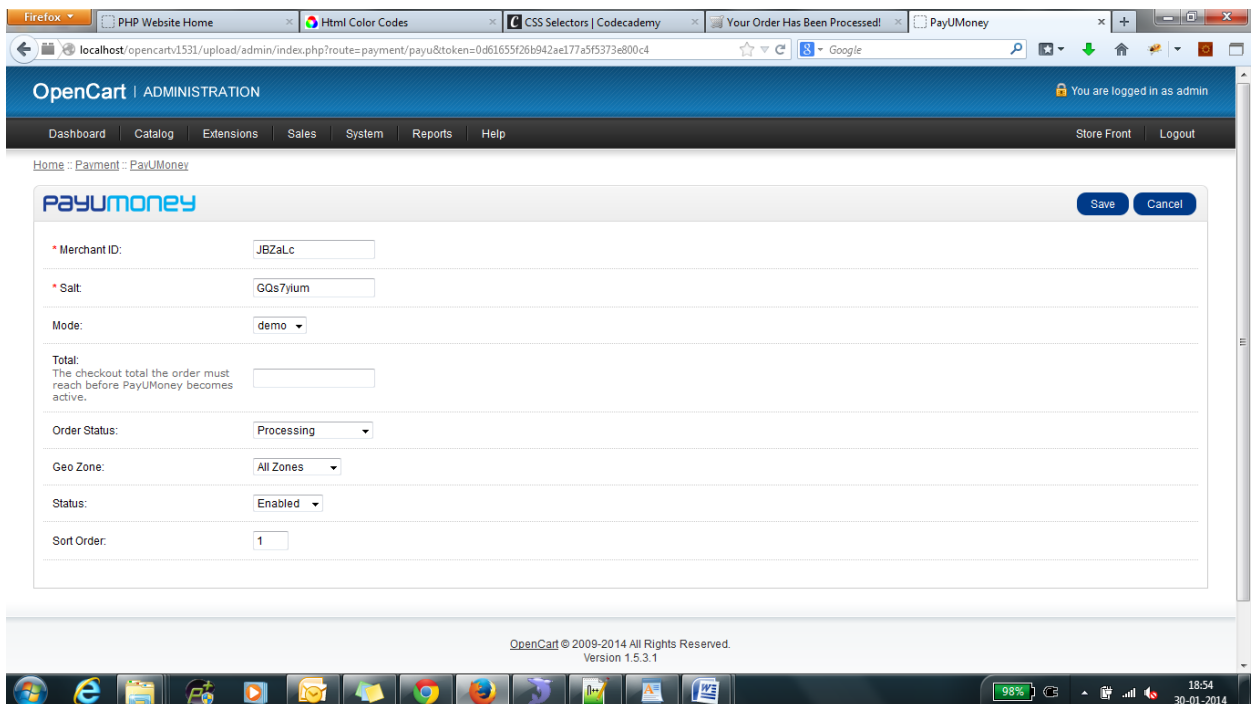

Step 4: You should land on the following screen –

Step 5: Click on install against the **PayUMoney**. You will notice an "**Edit**" link appears –
